SUMMARY

Associate IT Developer with hands-on experience across the full data engineering lifecycle, from ingestion and curation to production-grade data quality frameworks and analytics-ready platforms. Skilled in building scalable pipelines on Snowflake and Databricks, and in applying RAG-based AI agents to deliver governed, natural language access to enterprise data. Proven track record of resolving production issues, driving cross-functional adoption, and improving platform reliability across large enterprise data hubs. Passionate about combining data engineering rigor with applied AI to unlock business value.

EXPERIENCE

Medtronic

Associate IT Developer & IT Intern

Hyderabad, India

Nov 2024 – Present

Associate IT Developer

July 2025 – Present

- * Led migration and modernization of the enterprise **DIGIC Data Quality** framework from **Snowflake** to **Databricks**, ensuring continuity of critical controls on a scalable, cloud-native architecture.
- * Built a **RAG-based** Enterprise Market Share Agent in **Snowflake** for the EMEA RLM team, enabling natural language access to governed data across **15 countries**, **4,000+ accounts**, and **600+ users** (75%+ adoption).
- * Drove ingestion and curation initiatives across enterprise data hubs (Definitive Healthcare, Medidata, MedSurg, SFN360, Eloqua, SAP, Salesforce), supporting user groups from small teams to **500+ users**.
- * Built reusable frameworks for automated data quality onboarding across new tables and data hubs, reducing manual effort and improving governance; ensured reliable Dev/Test/Stage/Prod deployments and resolved DAG, migration, and credential issues.
- * **Awarded a CTO Recognition Award** for outstanding contribution to data engineering and AI-driven innovation.

IT Intern

Nov 2024 – July 2025

- * Onboarded USCV, N360, and MedSurg Salesforce instances to **Snowflake** and built curation modules enabling role-based reporting for the Global Commercial Team and CRM stakeholders.

UP Police 112

Intern

Uttar Pradesh, India

2019

- Optimized PRV dispatch operations and supported Action Taken Report (ATR) submissions to the District Control Room.

TECHNICAL SKILLS

Languages: Python, SQL, C, C++, Java

Data & Cloud Platforms: Snowflake, Databricks, Oracle Cloud Infrastructure (OCI), dbt, Salesforce, MongoDB

AI/ML: Generative AI, RAG/Conversational AI, Agentic AI, Vector Search, Machine Learning, Deep Learning

Tools: Streamlit, Git, Data Pipelines, DAG Orchestration

Upskilling: Coursera, Workera, AI-BI Summit (participant)

PROJECTS

Salesforce-to-Snowflake Data Ingestion & Curation | *Python, SQL, Snowflake*

- Built curated Snowflake data hubs from Salesforce sources to enable role-based reporting and blended insights for the Global Commercial Team and CRM.

Health Monitoring System for Patients | *Python, Machine Learning*

- Built a data analysis and disease-prediction system enabling individuals to check symptoms from medical report data.

Forecasting Models for Solar Generation | *Python, ARIMA, SARIMA, ML*

- Compared ARIMA, SARIMA, and ML models to forecast solar generation three hours ahead using GTI/GHI irradiance data.

EDUCATION

Vellore Institute of Technology

M.Tech in Artificial Intelligence / Machine Learning; GPA: 8.37

Vellore, India

Birla Institute of Applied Sciences

B.Tech in Electronics and Communication; Grade: 75.66%

India

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional | Oracle Cloud Infrastructure Certified AI Foundations Associate | Databricks Fundamentals

dbt For Data Engineers | Python Libraries for Data Science | StreamSets Machine Learning Platform and Intel oneAPI
